Maximum Marks	3 Marks

Project Executable Files

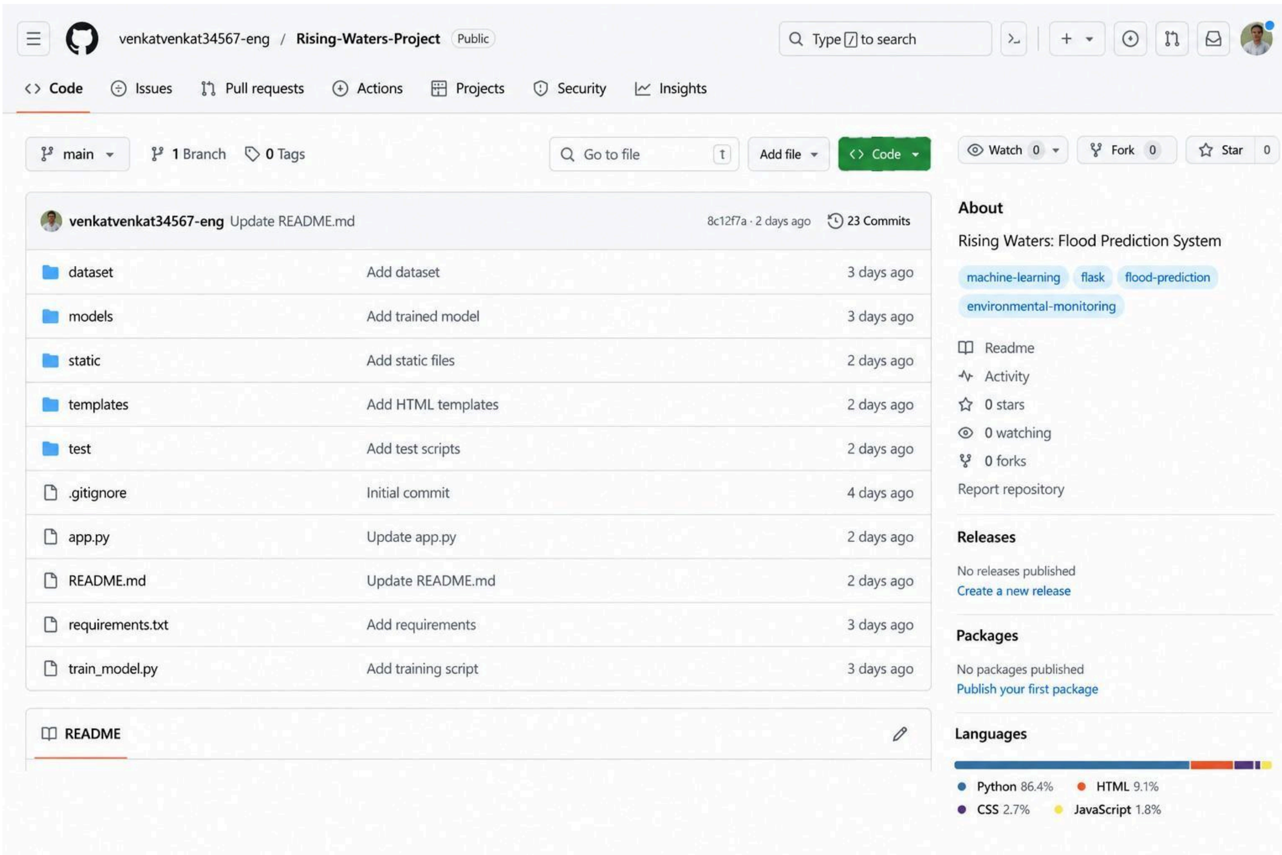
This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	No

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:



Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not deployed (Runs locally)
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Localhost (Flask Development Server
Repository Link	https://github.com/Sailu095/Rising-Waters-Project.git
Demo Video Link	https://drive.google.com/file/d/1MdXjvElIdNwKl9yDp9uKe4Zr-pGcYzKs/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Install **Python 3.10 or later**.
2. Open the project folder in VS Code or Command Prompt.
3. Install dependencies using:
   pip install -r requirements.txt

4. Start the application:
5. python app.py
6. Open the browser and visit:
7. http://127.0.0.1:5000
8. Enter rainfall, water level, humidity, temperature, wind speed, and soil moisture values.
9. Click **Predict Flood Risk** to view the prediction.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	No real-time weather data integration	Future enhancement
2	IoT sensor integration not implemented	Planned for future versions
3	Application is currently deployed only on localhost	Can be deployed to Render, Railway, or AWS later
